REAL-TIME MONITORING SOLUTION

pH/ORP Probe

Real Tech's bypass pH/ORP sensor provides rapid real-time measurement of pH, ORP (redox) and temperature in water and wastewater. This compact and robust sensor is available as a submersible probe for open channel wastewater installations or as a bypass style sensor for pressurized water installations.

Controllers and Accessories

Our innovative modular product platform ensures our clients gain the real-time water quality monitoring system that meets their specific demands and budget. With multiple sensor, controller and accessory options available, Real Tech provides a total solution for all of your unique water quality needs.

Liquid Ai Compatible

Our Liquid Ai data services complement our real-time water quality monitoring systems. Our Remote Monitoring platform is a powerful data management and visualization tool that enables access to data anywhere, anytime.

MEASUREMENT PRINCIPLE

Real Tech's pH/ORP combination sensors have been designed with a range to perform under harsh wastewater, seawater or high purity water conditions. The sensor features a long life reference with an innovative technology that increases the lifetime of the probe and decreases the frequency of cartridge refill. Ideal for many applications, the sensor features a quick response time, minimal flow dependence and low power consumption.
