Calibration Health Monitoring ensures accuracy and reliability are maintained so our clients can have the utmost confidence in their results, while our Remote Monitoring platform enables access to data anywhere, anytime.

MEASUREMENT PRINCIPLE

Real Tech's TOC sensor provides superior measurement performance across multiple wavelengths of light using UV LEDs. Many compounds absorb light in the UV-VIS spectrum including organic compounds. The sensor measures organics in a multi-dimensional way that results in improved correlations to aggregate organic water quality parameters, such as TOC and DOC. This allows the sensor to be able to detect changes in the composition of organics independently of their concentration. Real Tech's innovative TOC sensor is advancing water and wastewater management.
